

Mastering Switch Expressions

Andrejs Doronins

Software Developer in Test

Question 1

What will this code output?

```
Object skips = 10;  
  
switch (skips) {  
    case 1 -> System.out.println("a");  
    default -> System.out.println("b");  
}
```

Compilation
error

Question 2

What will this code output?

```
String vehicle      = "Motorcycle";  
final var truck     = "Truck";  
final String bicycle = "Bicycle";  
  
String category = switch (vehicle) {  
    case "Car", truck -> "Four-Wheeler";  
    case "Motorcycle", bicycle -> "Two-Wheeler";  
    case "Boat" -> "Water Vehicle";  
    default -> "Unknown Category";  
};  
  
System.out.println(category);
```

Two-Wheeler

Question 3

How many reasons could cause this code to NOT compile?

```
int category = 4;

var type = switch (category) {
    case 1, 2 -> "Guitar";
    case 3, 4 -> "Piano";
    case 5 -> "Violin";
    case 6 -> { yield "Triangle"; };
};
```

Two reasons:

- 1) Extra semicolon
- 2) Missing default

Question 4

What will be the output if we invoke “printLocation(Vehicle.BOAT)”

```
class TransportHub {  
    enum Vehicle { CAR, BOAT }  
  
    void printLocation(Vehicle v) {  
        byte type = switch (v) {  
            case CAR -> 1;  
            case BOAT -> 2;  
            default -> 3;  
        };  
        System.out.println(type);  
    }  
}
```

2

Question 4

What will be the output if we invoke “printLocation(Vehicle.BOAT)”

```
class TransportHub {  
    enum Vehicle { CAR, BOAT, AIRPLANE }  
  
    void printLocation(Vehicle v) {  
        byte type = switch (v) {  
            case CAR -> 1;  
            case BOAT -> 2;  
            default -> 3;  
        };  
        System.out.println(type);  
    }  
}
```

2

Question 5

What will this code output?

```
byte fruit = 2;  
String name = "Banana";  
String color = switch (fruit) {  
    case 1 -> { yield "Red"; }  
    case 2 -> { if (name.equals("Lime"))  
                yield "Green";  
                yield "Yellow"; }  
    case 3 -> "Purple";  
    default -> throw new RuntimeException();  
};  
System.out.print(color);
```

Yellow
